SUPPLEMENTAL CASH FLOW INFORMATION (Note 12)

The accompanying notes are an integral part of these interim consolidated financial statements.

SALAZAR RESOURCES LIMITED
NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS
FOR THE NINE MONTHS ENDED SEPTEMBER 30, 2008
(Unaudited - Prepared by Management)

1. NATURE OF OPERATIONS

On March 7, 2007, Consolidated Kookaburra Resources Ltd. changed its name to Salazar Resources Limited (the "Company"). With the recapitalization with Curimining S.A. ("Curimining"), the Company's principal business activity is the acquisition, exploration and development of mineral properties in Latin America. See also Note 3.

The Company presently has no proven or probable reserves and, on the basis of information to date, it has not yet determined whether these properties contain economically recoverable ore reserves. Consequently the Company considers itself to be an exploration stage company. The amounts shown as mineral property interests represent costs incurred to date, less amounts amortized and/or written off, and do not necessarily represent present or future values. The underlying value of the mineral properties and related deferred costs is entirely dependent on the existence of economically recoverable reserves, securing and maintaining title and beneficial interest in the properties, the ability of the Company to obtain the necessary financing to complete development, and upon future profitable production.

These interim consolidated financial statements have been prepared in accordance with Canadian generally accepted accounting principles ("GAAP") applicable to a going concern which assumes that the Company will be able to realize assets and discharge liabilities in the normal course of business. Accordingly, the financial statements do not give effect to adjustments, if any, that would be necessary should the Company be unable to continue as a going concern and, therefore, be required to realize its assets and liquidate its liabilities in other than the normal course of business and at amounts which may differ from those shown in the financial statements.

On April 18, 2008, Ecuador's constitutional assembly passed a decree which will impact the tenureship of certain of the Company's mineral resource interests. See Note 13.

2. SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

These interim consolidated financial statements of the Company have been prepared by management in accordance with Canadian GAAP and include the accounts of the Company and its wholly-owned subsidiaries, Curimining S.A., incorporated under the laws of Ecuador, and Salazar Resources (BVI) Limited, incorporated under the laws of the British Virgin Islands. Inter-company balances and transactions are eliminated on consolidation.

The preparation of financial statements in conformity with Canadian GAAP requires management to make estimates and assumptions that affect the amounts reported in the interim financial statements and accompanying notes. Actual results could differ from those estimates. These interim consolidated financial statements have, in management's opinion, been properly prepared using careful judgement with reasonable limits of materiality. These interim consolidated financial statements should be read in conjunction with the most recent annual consolidated financial statements. The significant accounting policies follow that of the most recently reported annual financial statements.

3. RECAPITALIZATION

On March 8, 2007 (the "Effective Date"), the Company, Curimining and Messrs. Fredy Salazar and Pablo Acosta (collectively the "Curimining Shareholders") completed an agreement (the "Curimining Agreement") whereby the Company purchased all of the issued shares of Curimining in exchange for the issuance of 15,000,000 common shares of the Company to the Curimining Shareholders and assumption of US \$970,000 owing to Mr. Salazar (collectively the "Acquisition"). In addition up to 7,000,000 additional common shares may be issued to the Curimining Shareholders on an earn-out basis. To fully earn these additional shares, a total of 11.2 million ounces of gold in an "indicated category" must be identified within a period of four years. The Company also issued 500,000 common shares, at an ascribed value of \$350,000, as a finder's fee in connection with the Acquisition. In addition the Company paid Canaccord Capital Corporation ("Canaccord") \$25,000 cash and issued 140,000 common shares, at an ascribed value of \$98,000, as a corporate sponsorship fee.

The completion of the Acquisition resulted in the Curimining Shareholders holding the majority of the Company's combined issued and outstanding common shares. Since the transaction resulted in the Curimining Shareholders acquiring control of the Company the Acquisition has been treated for accounting purposes as a recapitalization. In accounting for this transaction:

- (i) Curimining is deemed to be the purchaser and parent company for accounting purposes. Accordingly, its net assets are included in the consolidated balance sheets at their historical book value;
- (ii) control of the net assets and business of the Company was acquired on the Effective Date. The transaction has been accounted as a purchase of the assets and liabilities of the Company by Curimining. The assets and liabilities of the Company have been recorded at their fair values, as follows:

(a) Curipamba Project

The Company owns or has a right to acquire a 100% interest in 16 concessions covering approximately 71,297 hectares located in the provinces of Bolivar and Cotopaxi, Ecuador.

A portion of these concessions were acquired pursuant to an option agreement which requires three additional option payments of US \$25,000 on June 30, 2007(paid), US \$30,000 on June 30, 2008 (paid) and US \$500,000 on June 30, 2009.

(b) Ruminahui Project

The Company owns or has a right to acquire a 100% interest in nine concessions covering approximately 32,676 hectares located in the province of Pichincha, Ecuador.

One concession, the Moncayo concession, was acquired pursuant to an option agreement which requires two additional option payments of US \$42,000 payable in September 2008 and March 2009. Giving the introduction of the Mining Mandate in Ecuador the Company declared force majeure and has suspended all payments.

On April 18, 2008, Ecuador's constitutional assembly passed a decree which has created confusion over the status of the Company's tenure over its mining concessions in Ecuador. At this time a full and complete assessment of this new law has not been completed by the Company's Ecuadorian counsel and it is also uncertain if any amendments will be made to the law. As currently drafted, the Company's interpretation of how it will be impacted by the new law is that it will only retain tenure to three mining concessions with the balance to be cancelled. In addition no exploration can be conducted for a period of 180 days. It is not clear what happens once this 180 day period is up. To date, the Company has not received any formal order to cease or suspend any of its operations nor has it received any formal notification regarding title to its approximately 25 mineral concessions. The Company, together with other exploration companies, plans to meet with government officials to seek clarification of this law and amendments to ensure that tenure to existing concessions is assured. Pending clarification of the decree, the Company has suspended exploration activities and reduced its workforce in Ecuador.

- (b) As at September 30, 2008, 13,500,000 common shares are held in escrow.
- (c) Pursuant to the Curimining Agreement the Company may be required to issue up to 7,000,000 additional common shares. See Note 3.

7. STOCK OPTIONS AND STOCK-BASED COMPENSATION

The Company has established a rolling stock option plan (the "Plan"), in which the maximum number of common shares which can be reserved for issuance under the Plan is 10% of the issued and outstanding shares of the Company. The minimum exercise price of the stock options is set at the Company's closing share price on the day before the grant date, less allowable discounts in accordance with the policies of the TSX Venture Exchange. The stock options have a maximum term of five years.

During the nine months ended September 30, 2008, the Company recorded compensation expense of \$149,098 (2007 - \$263,000) on the vesting of stock options.

During the nine months ended September 30, 2008, the Company granted 250,000 (2007 - 2,793,100) stock options to its directors, employees and consultants and recorded compensation expense of \$132,500 (2007 - \$1,308,400).

The fair value of stock options is estimated using the Black-Scholes option pricing model with the following assumptions used for the granting or vesting during the nine months ended September 30, 2008 and 2007:

	September 30, 2008	September 30, 2007
Risk-free interest rate	2.89% - 4.52%	3.92% - 4.54%
Estimated volatility	85% - 95%	85% - 123%
Expected life	2 years - 3 years	2.5 years - 3 years
Expected dividend yield	0%	0%

Option-pricing models require the use of estimates and assumptions including the expected volatility. Changes in the underlying assumptions can materially affect the fair value estimates and, therefore, existing models do not necessarily provide reliable measure of the fair value of the Company's stock options.

11. FAIR VALUE OF FINANCIAL INSTRUMENTS

The fair values of financial instruments at September 30, 2008, were estimated based on relevant market information and the nature and terms of financial instruments. Management is not aware of any factors which would significantly affect the estimated fair market amounts, however, such amounts have not been comprehensively revalued for purposes of these financial statements. Disclosure subsequent to the balance sheet dates and estimates of fair value at dates subsequent to September 30, 2008, may differ significantly from that presented.

Fair value approximates the amounts reflected in the financial statements for cash and cash equivalents, amounts receivable and accounts payable and accrued liabilities.

The Company is subject to foreign exchange risk as certain of the Company's subsidiary and operations incur transactions and have assets and liabilities denominated in currencies other than the Company's functional currency, which is Canadian dollars.

13. ECUADOR MINING MANDATE

On April 18, 2008, Ecuador's Constituent Assembly adopted a Mining Mandate. The full impact and implications of the Mining Mandate on the Company's exploration and development activities in Ecuador is not entirely known at this time. The Mining Mandate limits mining companies to holding a maximum of three concessions. The Company holds significantly more than these concessions. The Company will seek to protect all assets and investments made to date.

The Mining Mandate invoked an immediate 180-day suspension of activities on virtually all mining concessions in Ecuador while a new Mining Law is drafted and adopted. The Company is awaiting formal notification from the Ministry of Mines and Petroleum of how the mining mandate will be implemented and the full effects of the Mining Mandate will have on the Company's operations. As required in the mandate, the Company suspended drilling operations in Ecuador.

13. ECUADOR MINING MANDATE (continued)

The Company may be further adversely affected by the Mining Mandate or changes to mining laws, regulations and requirements planned by the Government of Ecuador including the possibility of increased government participation in the mining sector and possible expropriation or changes in the way concessions are held. These may adversely affect the investment and may result in the impairment or loss of all or part of the Company's investment in mineral properties and deferred exploration. Management has assessed the impact of these developments and does not consider any impairment has resulted at this time.
